# RI TRANSPARENCY REPORT

## 2020

Craigmore Sustainable LLP

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

**SG 01.4**

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Core to our culture are our Sustainability Principles. At Craigmore, we believe sustainability means more than just "do no harm", it refers to an asset management strategy that improves the productive capability of the land while at the same time ensuring it's value for generations to come. From an investment perspective, it means we strive to protect the "evergreen" nature of the opportunity without any deferral of environmental liabilities longer term. Craigmore regards it as a privilege and a responsibility to manage land, soils, water and other natural resources for the long-term benefit of New Zealand

Team/Community:

1. Enhance the safety, skills and job satisfaction of our people
2. Promote open and honest communication with all parties
3. Promote well-balanced communities

Environmental:

4. Grow healthy and safe products
5. Protect and enhance animal welfare, biodiversity, soil and water
6. Minimise risk from use of chemicals and atmospheric pollution

Business/Financial:

7. Think long term and reward the team for behaving as owners
8. Measure risks and manage them to appropriate levels
9. Maximise profits within the above ethical and risk constraints
